

Installation of Corporate E-bank

Corporate E-Bank software contains all the functions of Personal E-Bank and additional features for multi user environment. Corporate E-bank is based on a common database. Multiple users with different privileges can connect to Corporate E-Bank in a Company.

Installation of the Corporate E-Bank software is more demanding than single user version, because it requires the installation of software on the user's PC and on the company's server. In order to operate properly, the Corporate E-Bank software requires IBM DB2 database. Installing software and configuring IBM DB2 connection must be done by appropriately qualified person.
