

Installation of Personal E-bank

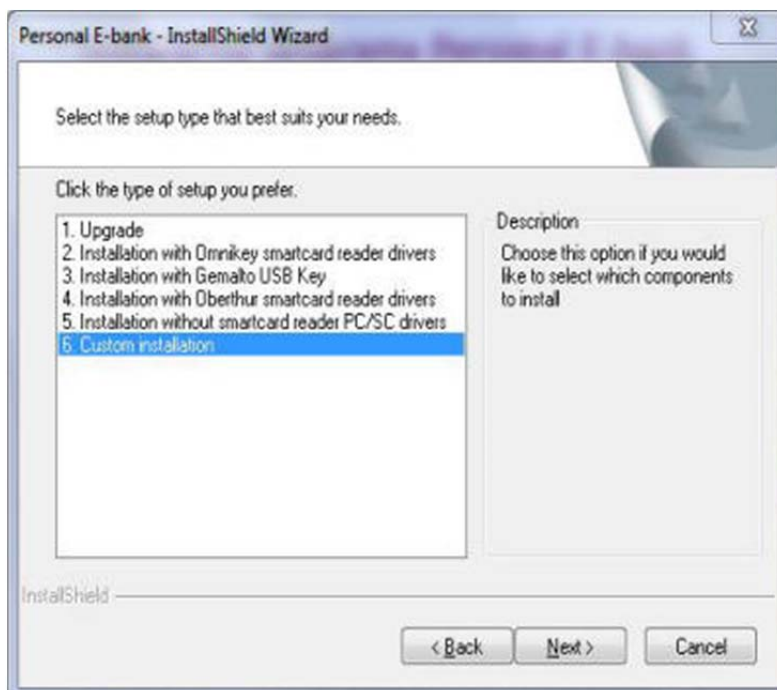

Installing a single user version of Personal E-Bank is a simple task, which does not require extensive computer knowledge.

We recommend checking the following before installing:

- Verify that the minimum requirements for mechanical equipment are met. Usually it is the size of hard disk space that is critical. Program **Personal E-Bank** requires approximately 200MB, which depends on the number of entries that you want to save in the files.
- Verify that the version of Windows you are using is operating without interference. If the operating system does not work as it should, remove all errors before installing Personal E-Bank.

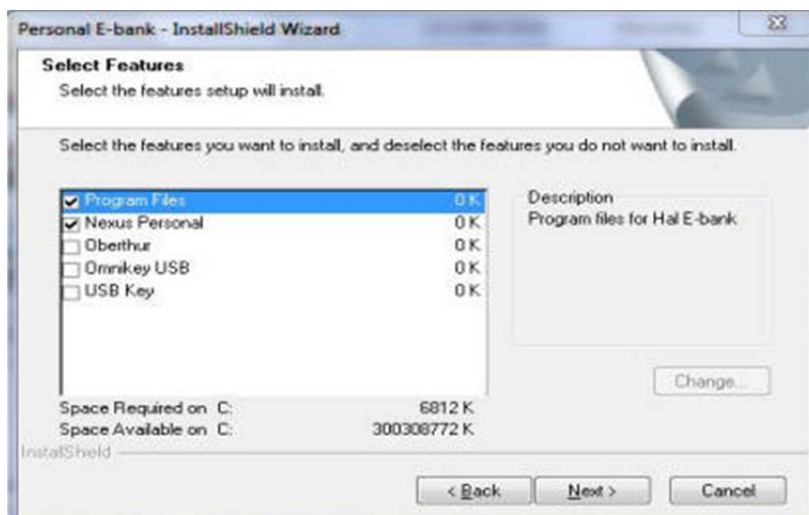

Once you provide all that is necessary for the installation of Personal E-Bank, start the installation.

When installing, make sure to select this option when the installation so requests:

Click Next

Select the following programs:

After this, click Next until the installation is finished. Once the „Setup“ disappears from the screen, restart the computer.
